

MAPPING THE MULTI-CLOUD ENTERPRISE

According to a new survey by A10 Networks and the Business Performance Innovation (BPI) Network, enterprises worldwide anticipate a continued rapid shift into multi-cloud computing. They see major benefits, but also face significant challenges in realizing the potential of multi-cloud, particularly in securing these new environments.

ENTERPRISES GLOBALLY ARE SHIFTING TO MULTI-CLOUD

ALMOST TWO-THIRDS

of enterprises are now using two or more public cloud platforms

say they will increase their use of public and private clouds over the next 24 months

say they moved at least 30% of their enterprise applications to the cloud

have moved more than half of all enterprise applications to the cloud

expect 5G and edge clouds will increase their move to multi-cloud (40%)

ASSESSING MULTI-CLOUD BENEFITS AND DRIVERS

WHAT ARE THE TOP 3 DRIVERS?

"Improving cost efficiencies"

"Moving applications and data closer to users"

"Safeguarding against failure"

WHAT ARE THE TOP 4 BENEFITS?

"Redundancy and disaster recovery"

"Cost optimization"

"Performance optimization"

"Selecting best clouds for specific workloads"

Multi-cloud orchestration is a key driver for containerization

SECURITY IS THE LEADING MULTI-CLOUD CHALLENGE

WHAT ARE THE TOP 4 CHALLENGES?

"Security across clouds, networks, applications & data"

"Skills and expertise"

"Centralized visibility and management"

"Infrastructure and application management complexity"

TOP NEEDS FOR IMPROVED SECURITY AND PERFORMANCE

"Centralized visibility and analytics"

"Automated tools to speed response and reduce costs"

"Centralized management from single point of control"

"Increased scale and performance of security solutions"

TOP SECURITY SOLUTION REQUIREMENTS

"Centralized authentication"

"Centralized security policies"

"Advanced web application firewalls"

"DDoS protection"

ABOUT A10 NETWORKS

A10 Networks (NYSE: ATEN) provides Reliable Security Always™, with a range of high-performance application networking solutions that help organizations ensure that their data center applications and networks remain highly available, accelerated and secure. Founded in 2004, A10 Networks is based in San Jose, Calif., and serves customers globally with offices in more than 80 countries worldwide.
